

# WHAT IS AN INTERIOR DESIGNER?

An **Interior Designer** helps make the inside of buildings look nice, safe, and work well. Here are some of the cool things they do:

## Draw Rooms and Plan Spaces

They draw pictures of rooms and decide where things should go—like bookcases, chairs, and tables.

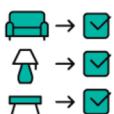

## Listen and Learn

They talk to people to find out what they need and like. Then they use that information to design rooms.

## Pick Paint Colors and Materials

They choose pretty paint colors for the walls and pick tile, carpet, and wallpaper. And they make sure these items are good for the environment.

## Choose Furniture and Equipment

They decide what furniture goes in the room. Making sure individuals with disabilities can use the spaces too.

## Select Safe and Comfy Fabrics

They pick fabrics for chairs and couches that feels good and won't hurt anyone.

**Interior Designers** go to college and get certifications to be able to design spaces. These spaces are public spaces that you have visited including schools, offices, and hospitals.

DESIGNING FOR  
**IMPACT**  
SHAPING THE  
FUTURE OF  
INTERIOR DESIGN
