

GUIDE TO BECOMING AN INTERIOR DESIGNER

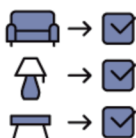

A Look at the daily responsibilities of an Interior Designer

It begins with a blank slate. A designer will listen and learn the needs for the project and turn creative thoughts into a beautiful, function, and safe interior environment! A designer will create floor plans to layout a space, select colors and materials, lighting, and other furniture and fixtures to create fun interesting places.

Build a career in Interior Design

Unleash your creativity to craft safe, beautiful, and functional spaces for homes, offices, hotels, restaurants, hospitals, and schools. The built environment goes beyond visually appealing spaces. An Interior Designer takes into account accessibility, building codes, and life safety features such as emergency exits. These fundamental concepts layered with lighting, colors, textures and furniture bring a design to life.
